## Exercise 8-4

### View the data file

Use Bookmark manager to navigate through tasks in the application

Before starting this exercise, make sure you run several processes in the application, to obtain various data files.

*When the **TDMS View** button (located in Tab File of the UI of PLC) is pressed during the process, and **data** folder should be opened in order to select desired data file for reading by **TDMS Viewer**.*

#### **Analyze the code:**

**8-4.1** What happens in the **UI Event Handling Loop** when **TDMS View** button is pressed?

**8-4.2** What happens in View TDMS state of the **Logger module**?

*When option Data/TDMS is selected from the run-time menu, **data** folder should be opened. This time, the file could be opened using e.g. MS Excel.*

**8-4.3** Run the application and click option Data/TDMS from the run-time menu. Open TDMS file in MS Excel and analyse data layout.
